

## DoD: Percentage of Sexual Assaults on Military Men

**Source of Data: Department of Defense Sexual Assault Prevention and Response Office (SAPRO) Annual Reports for FY 2007 through FY 2018.** Available at [www.sapr.mil](http://www.sapr.mil) (click on “SAPRO Reports” and “Annual Reports Archives”). SAPRO reports have varied in formats and content, but most have cited both “**unrestricted reports**,” which usually initiate disciplinary proceedings, and “**restricted reports**,” which provide help to individuals on a confidential basis. Since 2014, gender-specific percentages have appeared in report Appendices A or B, titled “**Statistical Data on Sexual Assault**.” This graph cites data from completed cases in three main categories: rape, aggravated sexual assault/sexual assault, and abusive sexual contact. **Data derived from completed investigations show that since FY 2007, rates of unrestricted reports of sexual assaults on males, most often by “subjects” identified as males, increased by 200%.** This graph does not include estimates of sexual assaults from the bi-annual **RAND Workplace and Gender Relations Survey of Active-Duty Members (WGRA)**, which uses online responses to assess the “prevalence” of sexual harassment and assault.
